

# Sintering Paste

A New Type of Sintering Paste with Furnace Auto-Cleaning Effect

- ✓ Good supportability
- ✓ Non-stick to restorations, no residue
- ✓ Smooth extrusion

## Product Features

- High-Temperature Resistant  
Stable up to 1000°C, no softening or adhesion.
- Strong Support  
Dense ultra-fine fiber structure offers excellent stability.
- Self-Purifying  
Absorbs impurities during repeated firings, protecting the furnace.
- Easy Application  
Syringe delivery with high-viscosity paste ensures easy shaping.
- Residue-Free Cleaning  
Easily removed with a brush after firing, leaving no residue.

## Application Scenarios

- ✓ Supports ceramic restorations during sintering to prevent deformation.
- ✓ Isolates restorations from trays during porcelain application and glazing.
- ✓ Ideal for complex-shaped restorations requiring secure fixation.

## Model

Volume	10 ml/unit
Shelf-life	2 years
